---

Apr 2022—present

Senior Engineering Manager

UOLO Edtech Private Limited

Engineering management tenure; current title shown.

- Architecture and hands-on engineering for AI Didi, a real-time voice tutor with streaming speech, specialized learning agents and session state.
- Designed coordination between model streaming, sentence chunking and ordered audio delivery.
- Worked on voice-pipeline observability, platform performance, background workloads and AWS capacity decisions.
- Led engineering delivery and mentored engineers while remaining involved in implementation and architecture.

Oct 2020—Mar 2022

SDE-3

UOLO Edtech Private Limited

- Worked on core-platform architecture using Node.js, Symfony, MongoDB and Redis.
- Built backend services and supported the production deployment lifecycle and traffic routing.

Sep 2018—Sep 2020

AVP of Technologies

Dociety Technologies Private Limited

- Led the transition from a monolithic application toward event-driven Node.js and MongoDB services.
- Worked on database bottlenecks, scaling constraints and production engineering.

Oct 2015—Aug 2018

Technology Head

BitGiving

- Led platform re-architecture using Yii2 and MySQL, including database design and migration planning.
- Improved legacy modules and investigated application performance bottlenecks.

Aug 2013—Sep 2015

Senior Developer

Technology 9 Labs

- Built backend integrations for travel booking and financial rewards workflows.
- Developed B2B commerce functionality in collaboration with product teams.

Jan 2012—Jul 2013

Junior Software Developer

Sharp Thrill Investigation & Flint Force Pvt. Ltd

- Developed PHP and MySQL applications from business requirements.

Technical focus

Node.js, Python, FastAPI, PostgreSQL, MongoDB, Redis, RabbitMQ, AWS and Docker. Real-time voice pipelines, LLM applications, retrieval-augmented workflows, observability and production reliability.
